Attorney General Jackley Joins \$120 Million Settlement with General Motors Over Defective Ignition Switch

PIERRE, S.D. –Attorney General Marty Jackley announced today a \$120 million settlement with General Motors Company (“GM”) over allegations GM concealed safety issues related to ignition-switch-related defects in GM vehicles. South Dakota will receive \$1,107,607.96 as part of this settlement.

The settlement, reached between the attorneys general of 49 states and the District of Columbia and General Motors Company (“GM”), concludes a multistate investigation into the auto manufacturer’s failure to timely disclose known safety defects associated with unintended key- rotation-related and/or ignition-switch-related issues in several models and model years of GM vehicles.

“Failure to disclose a vehicle safety defect in a timely manner was reckless,” said Jackley. “As consumers, we put our trust in known companies to ensure product safety, and this settlement addresses proper recalls, safety concerns and financial recovery.”

In 2014, GM issued seven vehicle recalls in response to unintended key-rotation-related and/or ignition-switch-related issues, which have affected over 9 million vehicles in the U.S. The recalls involved a defective ignition switch which, under certain conditions, could move out of the “Run” position to the “Accessory” or “Off” position. If this occurs, the driver experiences a loss of electrical systems, including power steering and power brakes. If a collision occurs while the ignition switch is in the “Accessory” or “Off” position, the vehicle’s safety airbags may also fail to deploy, increasing the risk of serious injury or death in certain types of crashes in which the airbag was otherwise designed to deploy.

As the states alleged, certain employees of GM and General Motors Corporation (which went through bankruptcy in 2009), knew as early as 2004 that the ignition switch posed a safety defect because it could cause airbag non-deployment. However, despite this knowledge, GM personnel decided it wasn’t a safety concern and delayed making recalls. GM continued to market the reliability and safety of its motor vehicles which were equipped with this defective ignition switch.

Under a consent judgment GM shall:

- Not represent that a motor vehicle is “safe” unless they have complied with the Federal Motor Vehicle Safety standards applicable to the motor vehicle at issue.
- Not represent that certified pre-owned vehicles that GM advertises are safe, have been repaired for safety issues, or have been subject to rigorous inspection, unless such vehicles are not subject to any open recalls relating to safety or have been repaired pursuant to such a recall.
- Instruct its dealers that all applicable recall repairs must be completed before any GM motor vehicle sold in the U.S. and included in a recall is eligible for certification and, if there is a recall on any certified pre-owned vehicle sold in the U.S., the required repair must be completed before the vehicle is delivered to a customer.
